PAYMENT VERIFICATION DESK CARD

Stop. Check. Confirm.

For shop counters, payment desks and staff approving transfers.

MONEY COMING IN: Before you release goods or complete an order

1. **Check your own trusted banking channel.** Open the business bank app or another reliable bank-approved account view yourself. Do not accept a screenshot, SMS or customer alert as proof of cleared funds.

2. **Match the details.** Check the amount and relevant payment details against the order. If pending or unclear, wait and verify with the bank.

3. **Use one agreed decision-maker.** Staff should know who is authorised to confirm payment.

4. **If not confirmed, do not release goods yet.** Explain that the order can be released after payment confirmation.

MONEY GOING OUT: Before you pay a supplier or contractor

1. Check the request against the expected invoice/order.

2. If supplier details change, use a previously trusted telephone number to confirm; never rely on the contact in the change message.

3. Check beneficiary details on the transfer screen.

4. Follow your approval rule; higher-value payments may require a second authorised check.

5. Keep payment evidence in approved secure records.

Your business rules: Person/role who confirms incoming credits: _____

Person/role approving transfers: _____ Second approval above: NGN _____

Known internal contact for payment questions: _____

Suspected fraud? Contact your bank/payment provider immediately via its official channel. Preserve evidence. No recovery guarantee. Never disclose OTPs, PINs, passwords or card security codes.
