BACKUP AND RESTORE TEST LOG

A backup is useful when you can recover what you need.

Business/team: _____ Checked by: _____ Date: _____

Files or service checked: _____ Primary location (general): _____

Backup method: [ ] Cloud [ ] External storage [ ] Other: _____

Protected backup location (general only, no credentials): _____

Date/time	What was backed up	Last backup confirmed	Restore test performed	Outcome	Issue / follow-up	Next check

Could a usable test copy be opened? [ ] Yes [ ] No [ ] Not tested

Any missing/corrupted files? _____ Follow-up owner: _____ Due: _____

Never record cloud passwords, recovery codes or encryption keys. Protect access to completed logs.
